

model driven engineering languages pdf

Model-driven engineering (MDE) is a software development methodology that focuses on creating and exploiting domain models, which are conceptual models of all the topics related to a specific problem.

Model-driven engineering - Wikipedia

Model-driven architecture (MDA) is a software design approach for the development of software systems. It provides a set of guidelines for the structuring of specifications, which are expressed as models.

Model-driven architecture - Wikipedia

Design, Evolution and Use of KernelF (Version 1.0, June 2018) KernelF is a functional language built on top of MPS. It is designed to be highly extensible and embeddable in order to support its use at the core of domain-specific languages, realising an approach we sometimes call Funclerative Programming.
