Systems Simulation: The Shortest Route to Applications. This site features information about discrete event system modeling and simulation. It includes discussions on descriptive simulation modeling, programming commands, techniques for sensitivity estimation, optimization and goal-seeking by simulation, and what-if analysis.

Classification: Based on a set of training data, categorize new inputs as belonging to one of a set of

categories. An example of classification is identifying whether an image contains a specific type of object, such as a cat or a dog, or a product of acceptable quality coming from a manufacturing line.
